## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 5, 12 – 16, and 37, drawn to a detail of wireless transmitting laser in laser ultrasonic system, classified in class 700, subclass 11.
  - II. Claims 6 – 11, 17 – 22, 30, and 34, drawn to security, access to a restricted system with identifier, classified in class 455, subclass 410.
  - III. Claims 23 – 29, 31 – 33, 35, and 36, drawn to remote controlling robotic device, classified in class 700, subclass 245
2. The inventions are distinct, each from the other because of the following reasons:

Inventions III, II, and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions III, II have separate utility such as *remote controller, wireless remote controlling robotic system, and controlling and generating command signal for security, access to a restricted system with using identifier*, respectively. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2684

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
